

## KNOWLEDGE+

The **knowledge+** incentive system will support projects in a broad range of areas including industry, energy, tourism, transportation, logistics and services. The incentive system is available to companies of any nature and legal form. Project proposals which involve collaboration with Madeira's existing scientific community are particularly encouraged. The goal of the system is to strengthen regional competencies in research and technological development.

Applications are open continuously. Madeira Tecnopolo is pleased to offer assistance in preparing proposals in strategic areas. Please contact [projects@madeiratecnopolo.pt](mailto:projects@madeiratecnopolo.pt) or the Project Coordinator at Madeira Tecnopolo for more information.

### Territorial Scope

The **knowledge+** incentive system is available to regional, national and international companies provided they have a legal presence within the European Union. All eligible investments must be realized within the Autonomous region of Madeira.

### Intellectual Property Policy

Rights to intellectual property created during R&D activities taking place under the **knowledge+** system will remain with the authoring entity. The right to disseminate these results after appropriate protection mechanisms are in place is reserved.

In co-promotion (partnership) projects, R&D entities will receive market-value compensation for intellectual property attributed to their efforts and transferred to their partners. Initial financial investments in projects will be deducted from the balance of such payments.

### Madeira Tecnopolo

Madeira Tecnopolo is a competence center tasked with adapting its region to a continuously changing physical, geographic and business space. Its goal is promote development in the strategic areas of innovation, applied research, new information and telecommunication technologies, sustainable development and the environment.

The **knowledge+** incentive system positions Madeira Tecnopolo as a key technical partner preparing and managing consortium project proposals and the establishment of international research centers in the following strategic areas:

- Technology, interaction and entertainment;
- Energy and environment;
- Health and biotechnology;

Madeira Tecnopolo works in close collaboration with the Madeira International Business Center one of the most attractive International Business Centers in the European Union. Visit <http://www.sdm.pt/WhyMadeira> for a detailed description of the competitive advantages.
